

TONI TRI SUPRIADI

Full Stack Developer

+62 895-3513-9721-6 • itsme@tonits.com • tonits.com • Purbalingga, Central Java, Indonesia

Summary

Full Stack Developer with 5+ years of experience in full digital performance, branding, and creative services. Specialized in strong building web applications from end to end — covering Frontend, Backend, and the development of scalable, brand-aligned Design Systems. Expert at partnering with creative and strategic teams to turn complex requirements into intuitive, reliable, and impactful digital experiences. Driven by clean code principles, modern engineering standards, and a continuous pursuit of quality.

Experience

PT Ultima Service Asia

Senior Web Developer

2021 — Present

Ultima Service Asia has division teams in Kemang and Kuningan, and I am based there. Focuses on providing full digital performance, brand and creative services with a strong focus on solutions and measurable results (ROAS, ROI, CPO, CPL, Brand Awareness etc)

- Collaborate with the creative team, UI/UX Designers, and project managers to design and develop websites based on client needs and requirements.
- Develop, deploy, and maintain both frontend and backend websites to ensure optimal performance, security, and stability.
- Develop new features, improve website performance, and optimize SEO and responsive design to enhance user experience.
- Perform troubleshooting, debugging, and bug fixing for websites, servers, and running systems.
- Manage databases, API integrations, and server configurations to support web application and system requirements.
- Ensure website security by implementing security best practices such as data validation, authentication protection, and system activity monitoring.
- Provide technical guidance, conduct code reviews, and supervise development teams to maintain code quality and development standards.
- Conduct regular testing, monitoring, and evaluations to ensure website functionality, compatibility, and system performance run properly.
